
MENTORING

Solutions that meet the needs of the entire family, one person at a time.

Mentoring

The overall goal of our mentoring services is to assist in developing a positive individual with the ability to function within the community. Additionally, we look to decrease negative and self-destructive behaviors by reinforcing good habits through positive role modeling, community involvement, and compassion for others.

Services

- Individual Assessments
- Vocational Assessments
- Case Management
- Transitional Living & Assistance
- Coordination of Service
- One to One
- Community Activates
- Behavior Modification
- Crisis

"I am not a teacher, but an awakener."

-Robert Frost

The All Care Family Services is committed to providing all encompassing services to the community. The most important service to any community is mentoring. Our mentoring process has been developed to address specific needs for our mentees throughout the use of service plans and treatment meetings. It is during these meetings that an individualized approach can be implemented and monitored.

It is the goal of All Care to supply a positive outcome to our mentees and families through positive reinforcement. We are aware that all children and adolescents are not in need of intensive services, but may need a positive role model during a critical time in their lives. It has been All Cares's experience, as well as the community findings at large, that mentoring adds value to everyone's life.
